Fact and Opinion

- You can prove a **statement of fact** true or false. You can do this by using your own knowledge, asking an expert, or checking a reference source such as an encyclopedia or a nonfiction text.
- A **statement of opinion** gives ideas or feelings, not facts. It cannot be proved true or false.
- A sentence may contain both a statement of fact and a statement of opinion.

**Directions** Read the following passage. Then complete the diagram below by following its instructions, and answer the questions.

In 1861, the fossil remains of an *Archaeopteryx* (Ahr-key-OP-ter-iks) were discovered in Germany. They are about 150 million years old. Many scientists believe *Archaeopteryx* is the earliest known bird. When I saw it in a museum, I thought it looked like it was part dinosaur and part bird. It had feathers and wings like birds. It also had teeth and three claws on each wing. According to many scientists, *Archaeopteryx* could fly, but I'm not so sure. I think it might have flapped its wings, but I can't imagine it ever got off the ground.

1. Underline a statement of fact in the passage above. Can it be proved true or false?
   1. How could you check?

2. Opinion—No
   Fact—Yes

3. Write a statement of opinion from the passage. How do you know it is a statement of opinion?

4. Which sentence contains both a fact and an opinion?

5. In the last sentence, the author expresses an opinion that *Archaeopteryx* couldn’t have flown. What kind of details would support this opinion?

**Home Activity** Your child read a short passage and identified facts and opinions. Read an article together. Ask your child to identify statements of fact and ask how they can be proven.
